

ARCHITECTURA

fits any plan

Architectura is the versatile system solution for the commercial sector. Developed with a view to the needs of architects and planners, the collection unites minimalist design with practical innovations all the while setting standards in terms of hygiene, maintenance and efficiency.

Washbasin

- + System solution that covers all manner of design requirements, developed specifically for architects and bathroom planners.
- + The design is based on timeless, geometric forms.
- + Broad scope for individual style thanks to different installation options and sizes.
- + In keeping with the latest trends, the current facelift results in a more delicate design for surface-mounted, built-in and undercounter washbasins. The built-in model also features a tap hole surface for standard tap fittings. The round washbasins are larger, in line with customers' wishes today.
- + The wall-mounted models can also be built into a washbasin countertop.
- + Installation-friendly and cost-efficient thanks to universal attachment.
- + Selected models also available with AntiBac.

Toilets

- + Rimless DirectFlush technology for a new type of hygiene.
- + Perfect-fitting solutions for rooms of all sizes - from the compact toilet to the commodious XL models or the extended Vita toilet (700 mm).
- + Selected models also available with AntiBac.

Urinals

- + Installation-friendly thanks to the flexible, height-adjustable outlet.
- + Maintenance-friendly and cost-efficient, as the ViChange siphon cartridge can be replaced without taking the urinal off the wall.
- + Can be combined with ProDetect 2, the new urinal flush control.
